MRC5-AR

AshburyPrecisionOrdnance.net/chassis

Lightweight Sport Utility Rifle Chassis

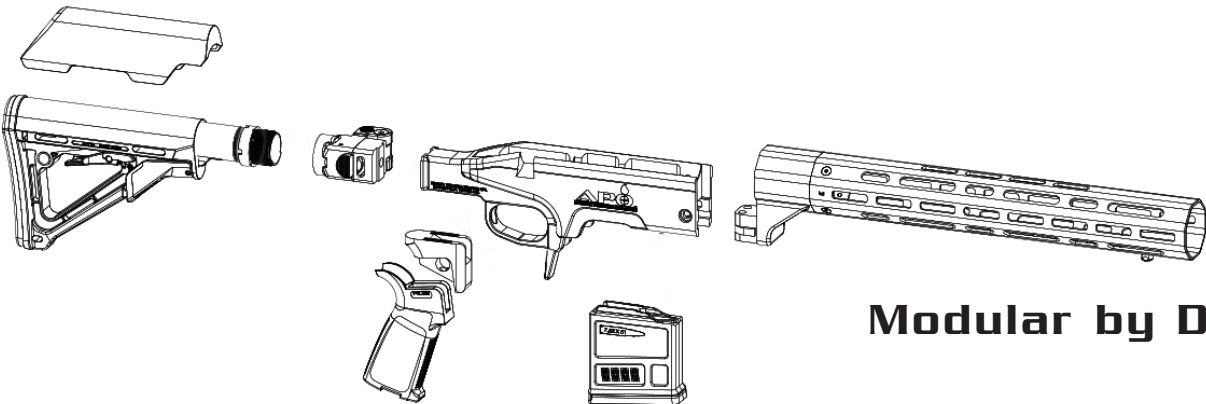

The SABER® MRC5-AR is Ashbury Precision Ordnance Manufacturing's lightweight, modular rifle chassis innovation which uses the popular Magpul CTR carbine shoulder stock and the SABER octagonal AR-08 aluminum alloy M-LOK® enhanced handguard. The MRC5-AR rifle chassis is designed for long gun users who want AR/MSR versatility and reconfigurability in a bolt action rifle platform. APO is the original inventor of the modern modular rifle chassis system and has been awarded 21 patents for its innovative design. The MRC5-AR is also used on the factory Savage Ashbury Precision Rifle and the GEN-II model is used on the SABER® M700™ Precision Rifle.

The SABER MRC5-AR modular rifle chassis is manufactured for the very popular Remington and Savage short and long bolt action rifles using aerospace-grade aluminum alloys and carbon reinforced polymers. The SABER modular rifle chassis requires no epoxy bedding to obtain the best accuracy from your rifle and is completely unaffected by extremely hot or icy cold weather conditions. The SABER MRC5-AR chassis provides recreational shooters, long range rifle enthusiasts, tactical rifle sports competitors, varmint, predator and big game hunters with a versatile modern sporting rifle platform. The MRC5-AR offers unmatched ergonomics and reconfigurability necessary in a bolt action rifle platform suited for every day field use.

Remington & Savage Models

- ✓ Short & Long Action
- ✓ Detachable Magazine
- ✓ Patented Design
- ✓ Lower Felt Recoil
- ✓ Modular Rugged Alloy Construction
- ✓ User Upgradeable
- ✓ Numerous Options & Accessories
- ✓ Simple Installation
